POLYURETHANE TIMING BELTS

**ATLATOS®
NOW AVAILABLE
WITH CLEATS!**

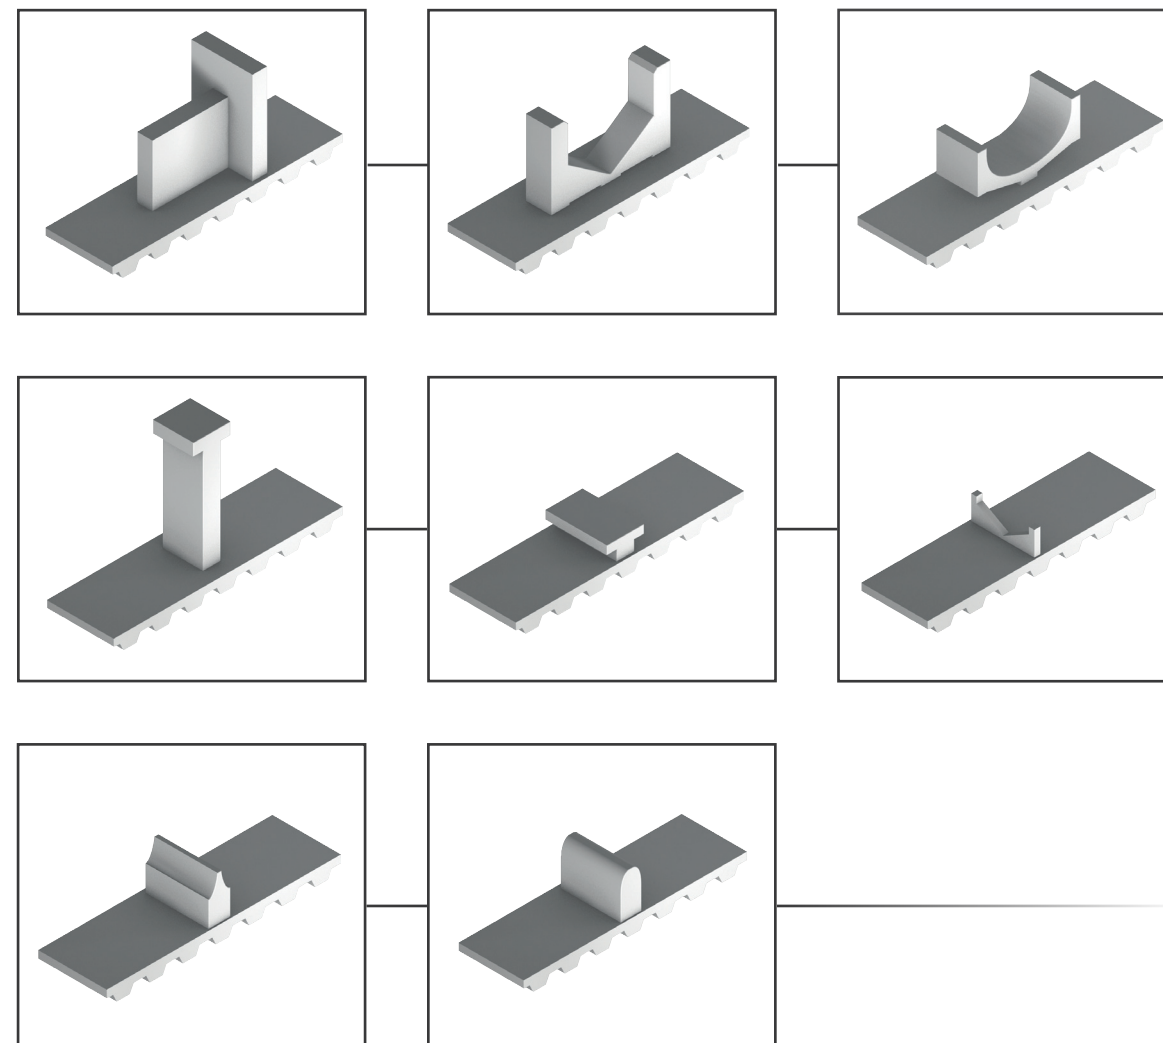

A BRAND OF **Bode Belting**
MEMBER OF INO GROUP

POLYURETHANE TIMING BELTS WITH CLEATS

Consisting of thermoplastic polyurethane the ATLATOS® can be provided with a variety of cleats for positioning and conveying applications. The cleats consist of the same material as the base belt, what results in an outstanding durability and homogeneity.

The product range includes next to standard rectangle cleats as well complex product solutions like cleats with holes or rounded edges, which can be fabricated on computer operated CNC machines. At Bode Belting the cleats are applied in an infrared welding process.

**We gladly develop your individual
timing belt with cleats.
Feel free to contact us - we are happy to advise you!**
